

IN THE CLAIMS

Claim 1 (currently amended): A cigarette lighter including a reservoir for storing fuel, a head formed on the reservoir, a valve for releasing the fuel from the reservoir, a nozzle put in the head for spraying the fuel from the valve, an ignition device for igniting the fuel sprayed from the nozzle into a flame, a cover for covering the head and an alarm for providing only one round of [[a]] an audible message every time the cover is lifted, with the alarm including a speaker providing the only one round of the audible message.

Claim 2 (currently amended): The cigarette lighter according to claim [[1]] 13 wherein the alarm includes a switch for contact with the cover when the cover is lifted.

Claim 3 (currently amended): The cigarette lighter according to claim [[1]] 13 including a collar installed on the head in order to support the cover.

Claim 4 (original): The cigarette lighter according to claim 3 wherein the collar includes two ears wherein the cover includes at least one ear put between and pivotally connected with the ears of the collar.

Claim 5 (original): The cigarette lighter according to claim 4 wherein the switch installed between the ears of the collar for contact with the ear.

Claim 6 (original): The cigarette lighter according to claim 4 including a pin for pivotally connecting the ear of the cover with the ears of the collar.

Claim 7 (original): The cigarette lighter according to claim 6 wherein the cover includes two ears.

Claim 8 (original): The cigarette lighter according to claim 6 including a spring arranged between the cover and the collar so as to bias the cover to the open position.

Claim 9 (original): The cigarette lighter according to claim 8 including the spring is a torque spring installed on the pin.

Claim 10 (currently amended): [[The]] A cigarette lighter according to claim 8 including a reservoir for storing fuel, a head formed on the reservoir, a valve for releasing the fuel from the reservoir, a nozzle put in the head for spraying the fuel from the valve, an ignition device for igniting the fuel sprayed from the nozzle, a cover for covering the head and an alarm for providing only one round of a message every time the cover is lifted, wherein the ignition device includes a body, a button extending from the body, an external button installed on the button and a rod extending from the external button, wherein the cover includes, in an edge, a hole for receiving the rod so as to lock the cover in a closed position.

Claim 11 (currently amended): The cigarette lighter according to claim ~~[[1]]~~ **13** including a lever for controlling the valve.

Claim 12 (currently amended): The cigarette lighter according to claim ~~[[1]]~~ **13** including a container integrated with the reservoir, wherein the ignition device is put in the container and includes an electrode extending to the vicinity of the nozzle.

Claim 13 (new): The cigarette lighter according to claim 1 with the cover being lifted for an ignition time to ignite the fuel and to use the flame, with the only one round of the audible message being of a duration less than the ignition time.

Claim 14 (new): The cigarette lighter according to claim 10 including a collar installed on the head in order to support the cover.

Claim 15 (new): The cigarette lighter according to claim 14 wherein the collar includes two ears wherein the cover includes at least one ear put between and pivotally connected with the ears of the collar.

Claim 16 (new): The cigarette lighter according to claim 15 including a pin for pivotally connecting the ear of the cover with the ears of the collar.

Claim 17 (new): The cigarette lighter according to claim 16 including a spring arranged between the cover and the collar so as to bias the cover to the open position.

Claim 18 (new): The cigarette lighter according to claim 14 including a spring arranged between the cover and the collar so as to bias the cover to the open position.
